Bio Data using C Programming

```c
#include<stdio.h>
int main()
{
  char name[50];
  printf("*BIO DATA*\n");
  printf("Enter your name:");
  gets(name);

  char age[10];
  printf("Enter your age:");
  gets(age);

  char address[100];
  printf("Enter your address:");
  gets(address);

  char phone[10];
  printf("Enter your phone number:");
  gets(phone);

  char email[50];
```

```c
    printf("Enter your email:");
    gets(email);

    printf("EDUCATION QUALIFICATION\n");
    char college[50];
    printf("Enter your college:");
    gets(college);

    char hsc[50];
    printf("Enter your hsc:");
    gets(hsc);

    char skills[50];
    printf("Enter your skills:");
    gets(skills);

    char certificates[50];
    printf("Enter your certificates:");
    gets(certificates);
    return 0;

}
```

```
*BIO DATA*
Enter your name:S.SUGASHINI
Enter your age:17
Enter your address:3/18,north street,meesalur,virudhunagar,626003
Enter your phone number:9791720413
Enter your email:saisugashinijune7@gmail.com
EDUCATION QUALIFICATION
Enter your college:rathinam technical campus
Enter your hsc:kshatriya girls higher secondary school
Enter your skills:drawing
Enter your certificates:c,c+,java

Process returned 0 (0x0)   execution time : 420.125 s
